Abstract

There are increasing interest in the modern concept of economic development which implied the transfer of the community from underdevelopment (which expressed in the form of restrictions on the freedom and choices range of the people) to a situation of interest in the insurance of political and civilized rights, along with the insurance of economic, social, and cultural rights. This mean of economic development is located in the heart of citizenship rights.

Better governance is one of the important channels which concentrate economic development based on citizenship rights.

The research is an attempt to analyze the controversial relation relationship between economic development in its contemporary concept as a citizenship rights and the aspect of governance. the main questions this research attempt to answer are:

- 1. what is the feature of governance in Iraq and what is its role in achieve economic development?**
- 2. is the performance in economic development promote citizenship rights in Iraq?**

The research provide evidence that poor governance in Iraq was reflected on economic indicators. Like increase unemployment, poverty, disequilibrium in income distribution, regression in human development indicators, and growth of corruption
